CEO comment

As we close 2025, I am pleased with how Enea continues to strengthen its profitability and strategic position despite a challenging macroeconomic environment. The fourth quarter was an important milestone, as we delivered solid results while launching our updated strategy for the coming years.

A significantly stronger Swedish krona (SEK), primarily against the USD, impacted our reported results during the quarter. In constant currency, we delivered growth of 1 percent, while reported net sales declined by 5 percent. Both our security and networks business showed a positive underlying development. For the full year, net sales grew by 2 percent in constant currency, while reported figures showed a decline of 2 percent.

Despite the currency headwind, we delivered strong profitability with an adjusted EBITDA of SEK 95 million (88), corresponding to a margin of 40 percent (35). This is a strong result that I am very proud of and a clear indication that Enea is well positioned to move forward in 2026 as we begin executing on our updated strategy.

During the quarter, we launched our strategy for the period 2026–2028. Our ambition is to deliver an average growth of over 10 percent during the period and to reach an adjusted EBITDA margin exceeding 35 percent by the end of the period. The strategy is built on three pillars: Market Acceleration, Vertical Expansion and Offering Evolution. A key focus area in the vertical expansion segment is the government sector, where we announced two strategic wins late in the quarter, further strengthening our market position.

Enea experienced a cybercrime incident, which was contained quickly and securely. The incident has been handed over to the authorities, and a criminal investigation is ongoing. We did not suffer any financial damage from this incident.

Overall, it was a solid quarter with high profitability, and it gives us a strong starting point as we execute on our updated strategy.

“High profitability despite FX headwinds”

Business development in Q4, 2025 – increasing number of government customers

During the quarter, Enea welcomed 10 new customers, of which 9 were within the security area, and 1 within the networks area. The following deals were announced in the quarter, and reflect continued customer activity across EMEA and APAC:

- An African government signed a telecom and security contract valued at USD 3.7 million, of which USD 2.4 million was recognized as net sales in the fourth quarter. The solution includes Integra Traffic Management, a virtual load balancer and the Qosmos ixEngine solution.
- A European Tier 1 operator signed a contract with Enea valued up to EUR 4.9 million, of which EUR 0.9 million was recognized as net sales in the fourth quarter. The customer selected Enea's access control solution to support the modernization of its network and enable migration towards a cloud-native infrastructure.
- An Asian government customer signed a contract valued EUR 1.3 million, of which EUR 0.9 million was recognized as net sales in the fourth quarter. The agreement covers the Enea Qosmos Probe (ixEngine) solution, providing high-capacity, real time visibility into data traffic, to strengthen the customer's threat detection capabilities.

Financial summary Q4 – good profitability driven by good cost control and business mix

Net sales declined by 5 percent (+1 percent in constant currency), totaling SEK 239 million (252). In constant currency, both core areas showed growth, with networks increasing by 1 percent and cybersecurity by 2 percent. Net sales continue to be driven primarily by Traffic Management within networks and ixEngine in security.

Despite the FX headwind, we reported an adjusted EBITDA margin of 40 percent (35) in the quarter, totaling SEK 95 million (88). License sales increased year-over-year, resulting in a more favorable business mix and contributing positively to profitability.

Cash flow from operations amounted to SEK 45 million (104). Our cost levels remained stable and were slightly lower year-over-year, driven by operational improvements and a stronger SEK, mainly against the EUR, where we have most of our costs.

Net financial items had a negative impact of SEK -6 million (41). Earnings per share amounted to SEK 2.21 (4.70).

Market developments supporting Enea's solutions

The following events have influenced the telecom and cybersecurity market during the quarter, which is driving the need for Enea solutions.

- EU Digital Networks Act proposal: The European Commission introduced a major draft law reforming telecom regulation, including unlimited-duration radio spectrum licenses to encourage investment and help achieve full fibre broadband coverage — a significant policy shift for EU operators.
- In 2025, telecom networks remained prime targets for ransomware, nation-state, and hacktivist attacks due to their critical infrastructure role, sensitive subscriber data, and geopolitical importance. Increasingly coordinated threats are pushing telecom operators beyond service delivery into the role of frontline defenders of digital trust and national security.
- Increasing geopolitical tension is adding to the needs for nations to invest in technology to defend their people. Controlling what communication enters and leaves a country is critical, and Enea delivers world-leading solutions to support this.

Summary and moving ahead

Macroeconomic headwinds were a challenge throughout 2025. Despite this, we continued to strengthen and accelerate our profitability towards the end of the year. The increasing number of deals won in the government sector, combined with continued solid development in the telecom sector, positions Enea well for continued financial progress in the year ahead.

Our growing customer base reflects strong confidence in Enea and the relevance of our solutions in an increasingly complex geopolitical environment. Secure communication is a fundamental requirement for both national security and technological development, and our world-leading products and solutions are well positioned to meet these needs.

From 2026, we move to our new financial guidance. Our ambition is to deliver an average annual growth above 10 percent during the strategy period, while achieving an adjusted EBITDA margin exceeding 35 percent by the end of 2028.

Our short-term guidance for 2026 is single digit growth with an adjusted EBITDA over 30 percent. In 2026 we will make investments that will accelerate our growth as part of our strategy.

I am confident that Enea is well positioned to deliver on these ambitions and to continue to create long-term value for our shareholders.

The Parent Company's investments during the period amounted to SEK 3.2 million (2.1). The number of employees was 17 (14). The Parent Company does not conduct any business of its own and its risks are essentially related to the operations of the subsidiaries.

Employees

At the end of the period, the group had 446 (482) employees.

The share and shareholders

Enea is listed on Nasdaq Stockholm [ENEA]. The company has a total of 19,103,285 outstanding ordinary shares.

Repurchase of treasury shares

Enea's holding of own shares at the end of the period was 1,457,296 shares, corresponding to 7.1 percent of the total number of shares. Enea announced on May 6, 2025, that the Board of Directors has decided to continue the share buy-back program until the day before the Annual General Meeting in 2026. During the period, 933,470 shares were purchased, of which 166,715 were repurchased in the quarter. During the period 641,903 ordinary shares were cancelled.

Annual general meeting

Enea's Annual General Meeting 2026 will be held on May 7 in Stockholm.

Nomination Committee

In consultation with the largest shareholders, the Chairman of the Board of Enea AB has established a Nomination Committee for the AGM 2026. The members of the Nomination Committee are: Per Lindberg (own mandate), Niina Arkko (Aktia Asset Management), Roger T Storm (Handelsbanken Fonder), Taymour Ezzat (Herald Investment Management) and Kjell Duveblad (Chairman of Enea AB). The duty of the Nomination Committee is to submit proposals for the Chairman and other members of the Board, and fees and other compensation for work on the Board to each of the Board members, to the AGM. The Nomination Committee should also submit proposals on the election and remuneration of auditors. The Nomination Committee should also submit proposals on the process of appointing a nomination committee for the AGM 2027.

The Board of Directors proposes no dividend

Enea's ambition is to build a larger and stronger company, which delivers increasing value for customers, employees and shareholders. Acquisitions that strengthen the company's market position and long-term earnings capacity, as well as continued investments in our product portfolio, are important parts of this endeavour. To enable and be well equipped for this type of acquisition, Enea needs to have a strong but also flexible capital structure. This can sometimes also mean that the company is net leveraged. Therefore, the Board of Directors needs to consider the company's long-term investment needs and financial position when considering dividends. Enea's long-term dividend policy is that at least 30 percent of profit after tax shall be transferred to shareholders. However, consideration shall be given to the Company's financial position, cash flow, acquisition opportunities and prospects. Given the company's acquisition opportunities and growth strategy for the coming years, the Board of Directors does not propose a dividend for 2025.

Material risks and uncertainties

Enea operates mainly in the areas of cybersecurity and telecommunications. The uncertain global situation is having a negative effect on the global economy, which affects customers' risk appetite and willingness to invest. For Enea, this means that some projects are delayed or not implemented. At the same time, the underlying drivers for telecommunications remain, which means a continued focus on virtualization, 5G and increased network capacity.

Enea's business strategy is based on developing new products and improving existing solutions, which involves significant investments. At the end of the period, the value of capitalized development costs amounted to SEK 221.3 million (232.8). Investments are made in markets with great potential for growth and profitability and after careful analysis. If, despite this, products are not technically or commercially successful, it may have a negative impact on the company's operations and financial position, which may lead to changes in strategy and priorities.

Since no other significant changes occurred during the quarter regarding significant risks and uncertainties, Enea refers to the statement in the latest Annual Report on pages 25-27.

Long-term ambition

Our ambition is to develop Enea into the leading challenger in specialized software for cybersecurity and telecommunications.

We are already established with major customers, and we are gaining new market shares with innovative solutions for the open, cloud-based systems of the future. We compete with large companies by being focused, faster and more agile, and we can attract the best talent.

We are changing our financial guidance. The ambition is to deliver an average annual growth above 10 percent during the strategy period, while achieving an adjusted EBITDA margin exceeding 35 percent by the end of 2028. Over time, we also want to make complementary acquisitions to further strengthen our market position.

Accounting policies

This interim report has been prepared in accordance with IAS 34. Interim reporting, which is in accordance with Swedish law through the application of (Swedish Financial Reporting) RFR 1 - Supplementary accounting rules for groups and RFR 2 - Accounting for legal entities, regarding the Parent Company. The same accounting principles, definitions of key ratios and calculation methods have been applied as in the most recent annual report for both the Group and the Parent Company, unless otherwise stated below.

Financial assets and liabilities

The Group applies IFRS 13. The standard requires disclosure of the uncertainty in valuations based on the three levels used for financial instruments.

Level 1: The fair value of financial instruments traded on an active market is based on quoted market prices on the balance sheet date. A market is considered active if quoted prices from an

exchange, broker, industry group, pricing service or supervisory authority are readily and regularly available and its prices represent real and regular market transactions at arm's length. As of 31 December 2025, the Group does not report any level 1 financial instruments.

Level 2: The fair value of financial instruments that are not traded on an active market (e.g. OTC derivatives) is determined using valuation techniques. In some cases, the Group uses currency derivatives for hedging purposes. Currency hedges are valued at market value by making an early allocation of the currency hedge to determine what the forward price would be if maturity were on the balance sheet date. As of 31 December 2025, the Group does not report any level 2 financial instruments.

Level 3: as of 31 December 2025, the Group does not report any level 3 financial instruments.

For other financial assets and liabilities, the carrying amount corresponds to the fair value.

Alternative performance measures

This Interim Report uses non-IFRS measures that Enea, and other parties use to evaluate Enea's results of operations. These measures provide management and investors with significant information to analyze trends in the company's business operations. These non-IFRS measures are intended to complement, but not replace, financial measures presented in accordance with IFRS.

For definitions of financial key ratios, please refer to the Annual Report 2024 with the following adjustments effective from 2025:

EBITDA

Profit before financial items plus depreciation. EBITDA adjusted is EBITDA adjusted for items affecting comparability. Items affecting comparability include, as from 2025, also FX gain/loss on operating items.

Items affecting comparability

Items affecting comparability can include restructuring costs, non-recurring write-downs, legal advice costs relating to major disputes, and transaction and integration costs relating to major acquisitions and, as from 2025, also FX gain/loss on operating items. Transaction costs include costs for legal and financial advice but exclude financing costs. Reversed earn-outs are also included in items affecting comparability items. The purpose of specifying these is to clarify the development of the underlying business.

Comparison numbers in the report have been adjusted according to updated definition.
